TWICE COOLED DOUBLE GROUND RANGE CUBES

Today, more than ever cattlemen are striving for the highest performance from their animals. In order to reach that optimum level of performance, cattle must maximize the rumen's ability to break down all forages. Since 1945, Lyssy & Eckel has worked with Texas Ranchers to formulate the best supplements to maximize their animal's digestive efficiency.

Cattle are grass harvesters and the key to maximum performance is making the digestion process in the rumen as efficient as possible.

All Lyssy & Eckel cubes are formulated to supply the necessary proteins, carbohydrates, minerals and vitamins to stimulate proper rumen function.

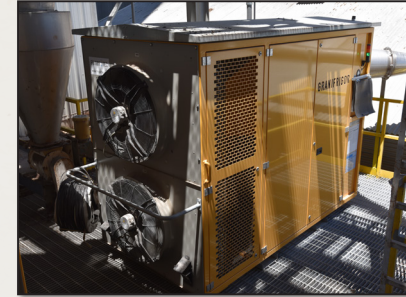

With a recently updated cube manufacturing system, Lyssy & Eckel is committed to delivering cubes that are free from excessive fines and waste. All Lyssy & Eckel Range Cubes are double ground prior to cubing, triple screened after the cubes are made and finally double cooled prior to shipment.

Our "state-of-the-art" pelleting system reinforces our commitment to deliver range cubes that will maximize cattle performance and profitability.

Benefits of Double Ground Range Cubes:

- Less waste—fewer fines
- Increased flowability
- Sustained release of nutrients
- Enhanced production of microbial protein
- Uniform consumption—less chasing

ALL PADDLEWAGON FLEET!

GRANIFRIGOR

Manufactured in Germany.
To thoroughly cool cubes prior to loading.

WYNVEEN CENTRIFUGE

Manufactured in the Netherlands.
To screen fines during the loading process.

DUAL FINES CATCHERS

All cubes travel across two fines catchers during the unloading process.

From Start to Finish...
NO FEED COMPANY DOES MORE.

Lyssy & Eckel

STUBBLE BUSTER CUBES

"All cubes are not created equal"

Don't waste your grass!

STUBBLE BUSTER CUBES

BENEFITS:

- In vitro studies show a 25% to 40% improvement in the digestibility of cellulosic based roughages(mature grass, mature hay, cotton burrs and peanut shells).
- Increases the anaerobic microbial activity of the rumen, thus enhancing the digestibility of low digestible roughage.
- Promotes early hydrogen production instead of methane and triggers enzymatic activity to break down the biomass in forages.
- Improvement in digestibility is most dramatic with low quality roughages.
- Effective in the digestion of all organics including carbohydrates, proteins and fats.
- Buffers the ruminant fluids at the correct pH level for optimum anaerobic activity.
- Assists in the transfer of essential micro nutrients(trace minerals).
- Helps maintain weight maintenance in range cattle.
- Improves milk production for lactating cows.
- Environmentally friendly for both meat and milk production.

STUBBLE BUSTER 20

GUARANTEED ANALYSIS

Crude Protein, not less than	20.00%
Crude Fat, not less than.....	3.00%
Crude Fiber, not more than	10.00%
Calcium, not less than	0.90%
Calcium, not more than	1.10%
Phosphorus, not less than	0.90%
Salt, not less than.....	0.90%
Salt, not more than.....	1.25%
Potassium, not less than	1.00%
Vitamin A, not less than	20,000 I.U./lb

FEATURES:

- All-natural protein
- Added Vitamins A, D, & E for improved breeding
- Formulated with structural carbohydrates and cottonseed meal to improve the digestibility and intake of all types of forages
- Supplies energy and protein not provided by limited pasture
- High in energy and digestible protein for improved breeding and milk production
- Screened prior to bagging, bulk loadout and bulk unloading to reduce fines

FEEDING DIRECTIONS:

Feed at the rate of 2 to 7 pounds per head per day.

STUBBLE BUSTER 26

GUARANTEED ANALYSIS

Crude Protein, not less than	26.00%
Crude Fat, not less than.....	2.50%
Crude Fiber, not more than	10.00%
Calcium, not less than	1.00%
Calcium, not more than	1.30%
Phosphorus, not less than	0.90%
Salt, not less than.....	0.90%
Salt, not more than.....	1.20%
Magnesium, not less than	0.60%
Potassium, not less than	1.00%
Vitamin A, not less than.....	20,000 I.U./lb

FEATURES:

- All-natural protein
- Added Vitamins A, D, & E for improved breeding
- Added magnesium to offset magnesium deficiencies found in mature grasses
- Formulated with structural carbohydrates and cottonseed meal to improve the digestibility and intake of all types of forages
- The most economical high energy breeder cube
- Screened prior to bagging, bulk loadout and bulk unloading to reduce fines

FEEDING DIRECTIONS:

Feed at the rate of 2 to 7 pounds per head per day.

STUBBLE BUSTER 39

GUARANTEED ANALYSIS

Crude Protein, not less than	39.00%
Crude Fat, not less than.....	2.00%
Crude Fiber, not more than	14.00%
Calcium, not less than	0.10%
Calcium, not more than	0.30%
Phosphorus, not less than	1.00%

FEATURES:

- 100% cottonseed meal
- The most economical supplement for cattle on mature pasture
- Stimulates the rumen to improve the digestibility and intake of valuable stockpiled forages
- Supplies the supplemental protein necessary for peak milk production
- Screened prior to bagging, bulk loadout and bulk unloading to reduce fines

FEEDING DIRECTIONS:

Dry Cows:	1#/head/day
Lactating Cows:	2#/head/day
Calf Creep Feed:	1#/head/day
Stocker Calves:	1#/head/day

ALSO AVAILABLE IN 32% AND 35%
